

HOW TO INSTALL LIGHTROOM PRESETS

1. Download the presets from the link that I provided you with above.
2. Open Lightroom
3. If you are using a Mac, click on Lightroom in the top menu bar, then click on Preferences. In Windows, you will navigate to Edit -> Preferences.

4. In the Preferences box, click on the Presets Tab, then click on the Show Lightroom Presets Folder

5. A new Finder window (Mac) or Explorer window (Windows) will open. Open the Lightroom Folder, then open the Develop Presets Folder.

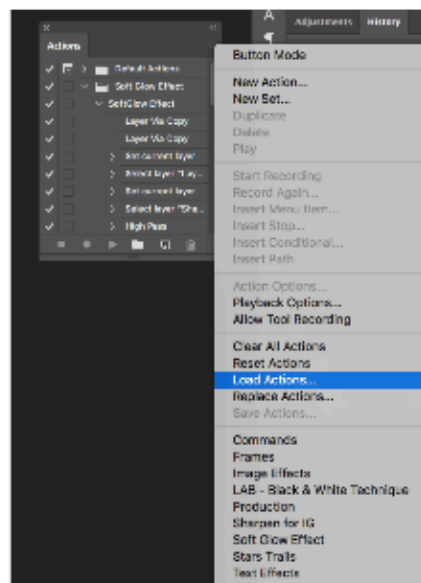

HOW TO INSTALL PHOTOSHOP ACTIONS

Photoshop actions are super simple to install. Locate the Actions that you want to install. These files end with .ATN. You may need to unzip them, if they are in a zipped file.

The easy method for installing Photoshop Actions is to double click on these files and Photoshop will load them into the actions panel automatically.

Another method is to go into Photoshop and open the Actions Panel. Click on the dropdown menu and select Load Action. Then all you need to do is locate the actions from your file menu and click on them.

And that's it! Pretty simple.

It's a good idea to save these actions somewhere important so that if you ever upgrade Photoshop or have Photoshop on different computers then you can locate the actions on your computer if you need to install them again. You're not reliant on them being solely in Photoshop.
